FOR IMMEDIATE RELEASE

**LEXICON RELOCATION
RANKED #1 IN KEY QUALITY CATEGORIES**

November 21, 2011 —Lexicon Relocation, a premier provider of global relocation and assignment services, received top rankings for overall provider excellence in 8 key quality categories in the Relocation Management Companies Quality Survey conducted by Trippel Survey & Research, LLC[®]. The survey is conducted annually as a comparison of independent evaluations from corporate relocation managers.

Key categories that were evaluated include satisfaction ratings associated with: quality of staff, service delivery, integrity, accounting practices, financial stability, stability of personnel, technology, data privacy and protection, expertise, timeliness, accuracy, value, cultural fit, management reporting, cost containment strategies, and overall satisfaction of the relocation management provider.

“The outstanding satisfaction results are proof of the dedication of our entire staff to the ‘Take Care of the Customer’ quality service philosophy at Lexicon. I think the ranking we may be most proud of is our clients’ demonstration of **‘willingness to recommend to other companies’**. That is the highest compliment a client can pay us and a clear indication of our continued success in focusing on our clients’ unique relocation and assignment needs,” said Michael P. Mancini, Lexicon’s Executive Vice President and COO.

Among the 21 relocation companies rated with market share significant enough to be ranked, Lexicon received Top 3 averaged scores on over 70% of the measurements. Similarly, Lexicon received a Top Score in areas of Experienced People, Staff Tenure, Data Security/Integrity, Technology and Expense Management.

“Trippel surveys are recognized as a key performance measurement standard within the relocation industry,” said George Doyle, Lexicon’s President. We take great pride in receiving this acknowledgement of Lexicon’s accomplishments for and with our clients. Ranking first in the industry in scores on Technology/Information and the Process Management of Expenses for client employees is especially rewarding to us because of the amount of energy and capital we have invested in this area. I am delighted to see our systems and people recognized in this way,” he concluded.
